Re: Porsche Carrera Cup USA cars

Good Morning:

I own Cup car #WFOAB2965NS420575, which I understand was one of the cars set up by you then put aside as a "parts" car. I would like to know, when these cars were converted back to a street configuration, if you also returned the horsepower to the stock 247 hp or left it at the 271 hp as stated in the specification outline in "Upfixin' der Porsche," Vol. IX, page 242?

Thank you very much and I look forward to your response and any additional information you might care to forward me regarding this incredible machine.

Sincerely,

~~_____~~

Engine Output was as in Race Condition!

No changes made.

Regards
